

DAGARTECH®
ENERGY SOLUTIONS

At Dagartech we like to say that we are the energy that sets many industries in motion, like our clients' businesses, or that gives light to the lives of thousands of people. A light that shines brighter at night, and is there when you need it.

And that's actually what we do with our customised energy solutions. You could say that we are a European brand of generator sets. However, we are much more than that. **If you have a challenge on your hands in the power generation sector, we are convinced that we can be a good partner to share that project with.**

And so, we would love to have five minutes of your time to tell you who we are, what we do and, above all, how we can help you.

Will you join us?

Telf. +34 976 141 655
info@dagartech.com
www.dagartech.com

We are a company specialised in customised energy solutions

For us, no two projects are the same, and no two gensets are the same. At Dagartech, we help you translate your needs into technical specifications. We design and manufacture your custom-made generator set and accompany you during the process to ensure that everything will go smoothly.

Why can you trust us?

- **Because we have experience**

We have extensive experience and knowledge of the power generation sector.

- **Because we work with quality**

We work with the highest quality standards to ensure that your generator sets are reliable, safe and accompanied by the best possible care and service.

- **Because we customise your generator**

We design and develop energy solutions that respond to the challenges, needs and circumstances of our customers.

Constantly
evolving to
offer you the
most intelligent
energy solution

DAGARTECH®
ENERGY SOLUTIONS

Our goal is **to offer you the best comprehensive solution** (product + service + commercial experience) **in the gensets market.**

We are a team of professionals with extensive experience in the power generation sector, who are at your disposal to advise you on the selection, design and manufacture of the most suitable equipment for each application, in a wide range of capacities from 3 kVA to 2,000 kVA.

Generator sets made in the EU

We design and manufacture our generator sets in Spain.

Committed to the quality of our products and services

Quality and continuous improvement are the principles that accompany us every day to offer you generator sets with the maximum guarantees.

Dagartech is a company that has been assessed and certified as meeting the ISO 9001:2015 requirements.

Reliable and safe equipment

We use top brand components, guaranteeing high reliability and safety in all our generator sets.

Much more than a technical service

We offer an agile after-sales service and comprehensive advice from highly-qualified professionals.

Would you like to get to know us better?

VISION

We see ourselves...

- **Offering you a wide range of energy solutions**, which can meet all your needs in different power ranges.
- **Achieving an internationally-renown position in the power generation industry** which reaches more and more customers and more industries.

MISSION

And that's why we work...

- **To offer you a comprehensive response**, from the selection of the generator set up to its installation.
- To guarantee **the best genset** for your customers and **for your business**.
- To **promote stable and sustainable growth** of our distributors, our suppliers and our staff. **If they grow, so will we.**

VALUES

We carry in our DNA...

EXPERIENCE & KNOWLEDGE AT YOUR SERVICE

We are a highly qualified team with extensive experience in the power generation sector.

FLEXIBILITY & DYNAMISM TO PROVIDE INTELLIGENT SOLUTIONS

We adapt our capabilities, products and services to the circumstances of each project and each client.

COMMITMENT & PROXIMITY TO ATTEND TO YOUR NEEDS

There are no big or small projects for us. We commit ourselves to the maximum for each project so that everything goes well.

PASSION & MOTIVATION TO DRIVE YOUR PROJECTS

We like what we're doing and the tasks that lie before us. We work every day to improve ourselves in order to offer better energy solutions.

We love what we do, and we like to do it well.

Our commercial attention, technical advice, design and development of our products, the technical assistance we provide and, of course, the manufacturing and performance tests run on each machine before they leave our plant.

All our products and processes have been evaluated and certified based on compliance with ISO 9001:2015 requirements.

The management of Dagartech, manufacturer of generator sets, as part of its Quality Policy, is committed to:

Guaranteeing for our entire organisation the knowledge, implementation and development of our Mission, Vision and Values, as a fundamental basis for the achievement of our strategic objectives.

Providing the means necessary to facilitate their fulfilment and approach to interested parties.

Ensuring that all activities and products manufactured by Dagartech strictly comply with applicable legal rules and regulations at all times.

Continuously improving our company, relying on our management system through its continuous evaluation and updating.

Approved by the Dagartech Directorate-General on 1 October 2020 (V.1).

Wherever there is a technological challenge, you will find us with a new energy solution

Every project in the field of energy is different. However, some of them have shared features.

At Dagartech, we have been able to adapt to every challenge that has been set before us, and this has allowed us to specialise in different sectors and target applications where the installation of electrical generators is required.

That's why **we work every day to develop generators that can meet the needs of different fields of application**, analysing the complete life cycle of the machine and the conditions of use that will appear in each circumstance.

Below, we show you the main fields of application for which Dagartech has designed and developed tailor-made product ranges and energy projects.

Industry

We have designed multiple generator sets specially intended for use in diverse industrial applications, as a main source of power supply or for emergency contexts.

Machinery leasing

We have a complete range of references specially designed for operation by machinery leasing companies, in various fields of application.

Data Processing Centres (DPCs)

We have extensive experience in the development of integral energy projects for data processing centres. We feature approved engines for DPCs.

Construction

The generating sets for use in the construction sector present important specific characteristics, to which Dagartech responds with a wide range of generators.

Events

If you need a generator to make sure nothing goes wrong with your events, we have the generator you need. Super silent units capable of working in parallel will guarantee the reliability you need.

R+D+i Centres

The research centres and R+D+i institutes are usually equipped with equipment with high energy demands, as well as requiring absolute guarantees of uninterrupted operation. In these cases, we work on obtaining the best emergency energy solution for each circumstance.

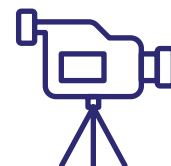

Infrastructures

Gensets specially designed for use in infrastructure. Aviation, rail, sea or telecommunications are some of the most prominent destinations.

Hospital sector

There are times when you're not allowed to fail. For those moments we have designed high-quality generating sets that Dagartech offers to the hospital sector. Fail-safe components and predictive and preventive maintenance services ensure constant power in this sector.

Audiovisual sector

The audiovisual sector requires power generators with which to guarantee the normal course of its activity (uninterrupted broadcasting and supply in case of power failure), and at Dagartech we have developed several national and international projects in this sector.

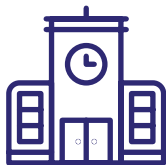

Residential

Dagartech has designed and developed numerous projects for the installation of generating sets in housing stocks and urban developments. Power failure equipment with high attenuation elements offer reliable and silent service.

Public spaces infrastructure

Dagartech has designed and developed generators suitable for emergency use in various public spaces, such as shopping malls, town halls or sports facilities.

Educational Centres

At Dagartech, we have carried out numerous projects for schools and diverse educational centres, integrating equipment in synchronisation with the electrical network for operation under network failure.

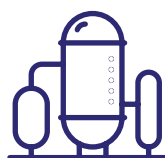

Hotel and catering

We have carried out numerous projects to meet the energy needs of the hotel and catering sector, with solutions adapted to each case.

Oil&Gas

If you need generator sets ready to work in the upstream sector (exploration, drilling and fuel extraction), refineries, fuel storage facilities or service areas, we can help you.

Power plants

We work in the development of generator sets to be part of distributed generation power plants.

Mining

Robust generator sets which guarantee a maximum level of reliability and very flexible equipment to meet the requirements of the activities for the exploitation and extraction of minerals.

Military

The military field is a strategic sector in which we have developed multiple projects, offering generator sets with a high level of customisation, quality, robustness, reliability and adaptation to demanding and complex environments.

Agriculture and Livestock

Dagartech has developed a complete range of generators (diesel, air and water) to meet the needs of the primary sector.

Do you need a generator with unique characteristics?

We specialise in customised energy solutions

In addition to offering a wide range of standard references for generator sets, at Dagartech we are specialists in tailoring energy solutions. If you need an electric generator with special features, we can help you.

Dagartech generator sets are always designed and developed with the **target application in mind**, considering the **machine's use** circumstances and the **global power generation market trends**, as well as the needs and demands of our customers.

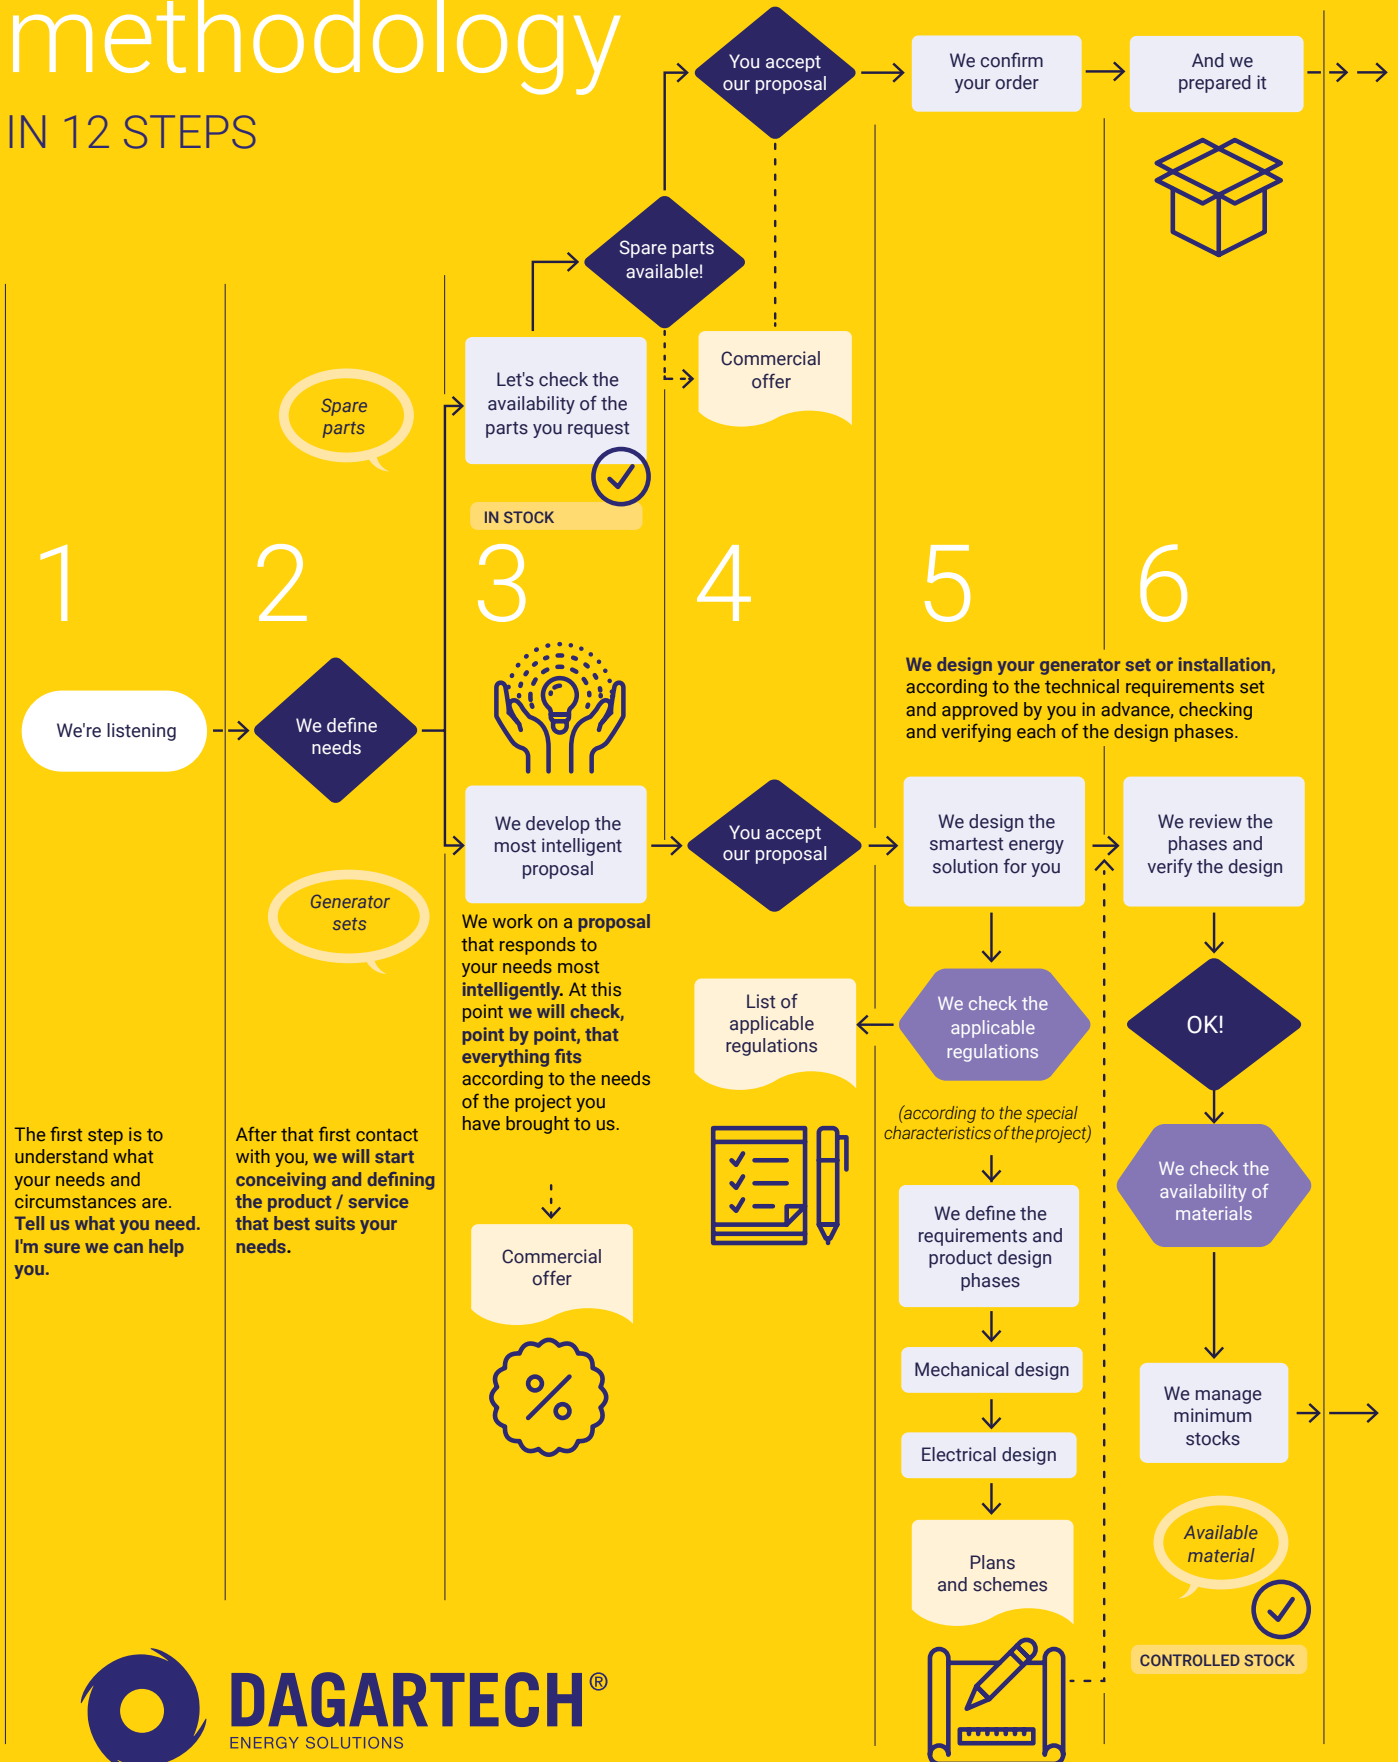

This way, **we are capable of offering a wide range of standard references** for generator sets that make up the different Dagartech product ranges.

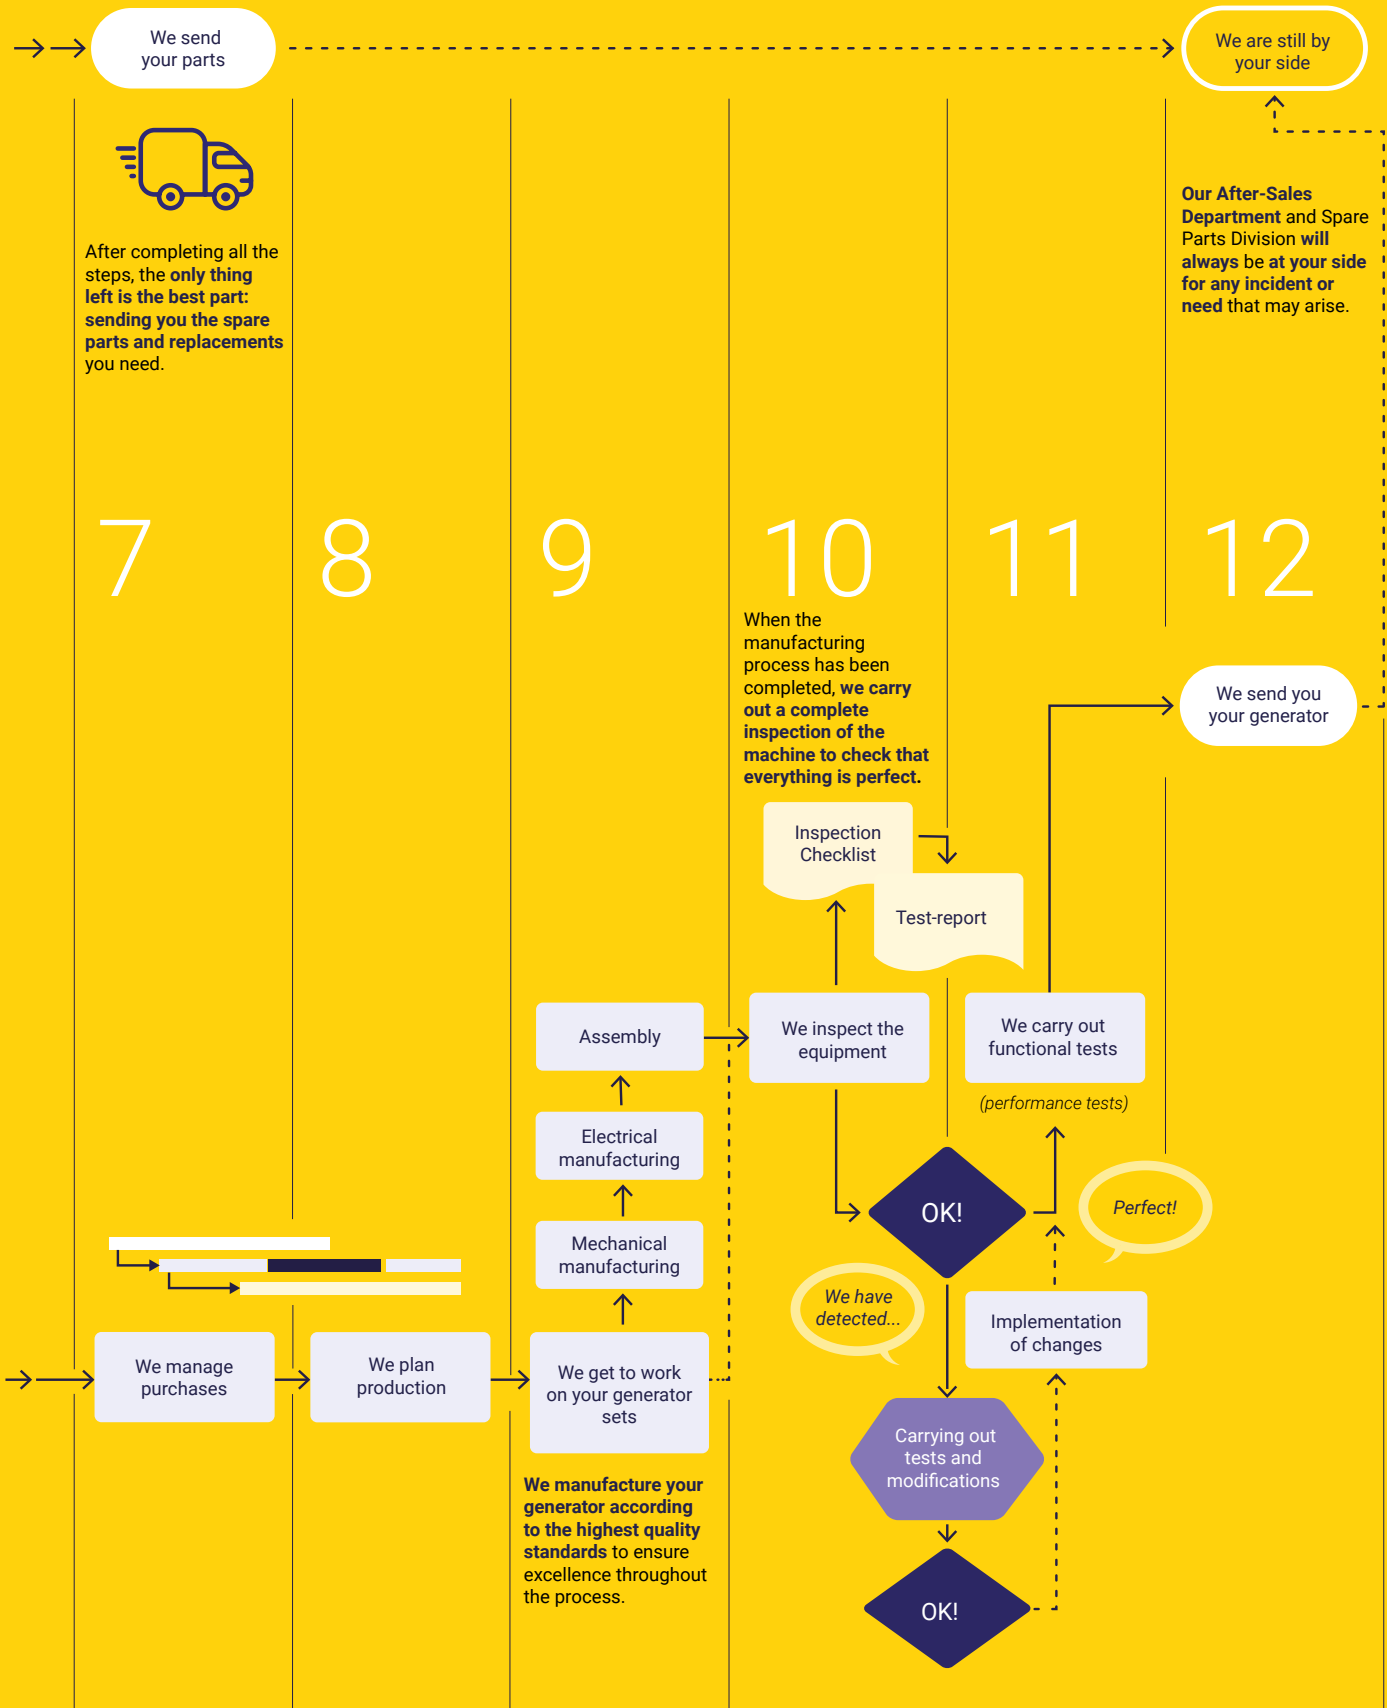

However, every project is different and presents particular characteristics, to which we must respond in an agile and professional manner. **And this is precisely what we specialise in.**

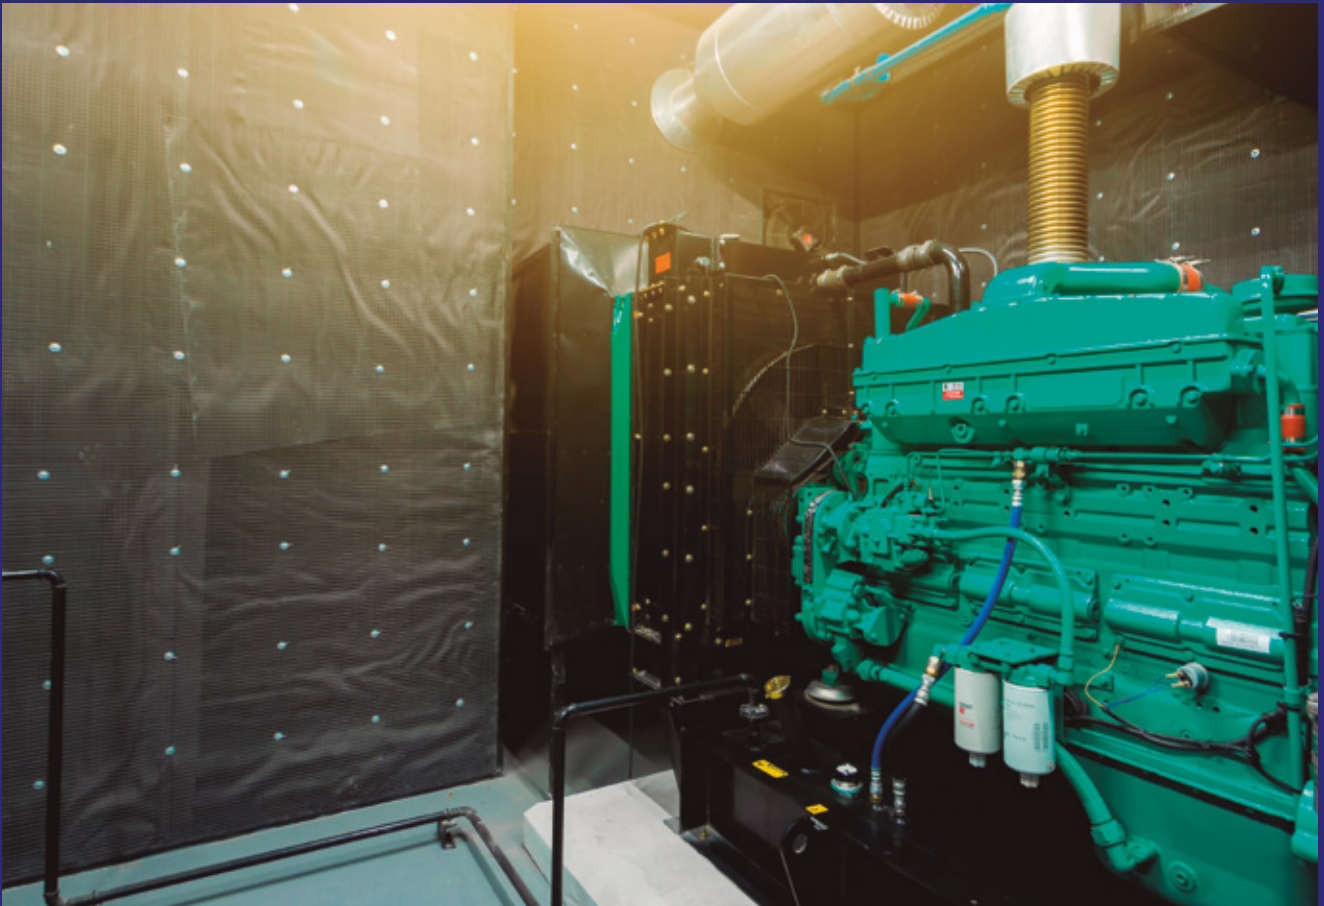

Our work methodology

IN 12 STEPS

Get to know our generator sets

For every target application, for every circumstance of use, for every need. At Dagartech, we have developed a wide range of references to meet the demands of our clients.

Diesel generator sets

Portable generator sets

Gasoline - 50Hz (1,500 rpm)

If you're looking for a gasoline electric generator that's reliable, **compact, manageable and guaranteed to last a long time**, you are sure to find the one that best suits your needs among the many models in our portable range.

The gasoline generators in our Portable Range are structured around **different ranges, with versatile equipment that is compatible with multiple options** that will allow you to customise your equipment and adapt it to the target application for which you need it, **when your power needs do not exceed 24kVA**.

OUR PRODUCT RANGES	POWER RANGES	APPLICATIONS

By your side before, during and after the launch of your generator set

At Dagartech, we don't just make generator sets.

We work to offer you a comprehensive service that covers all the needs that may arise. From the search for the electric generator that best suits your needs, to commercial support and constant and transparent communication during the sales process, to the resolution of any problem or incident, assistance in the installation of the machine, repair, or simply maintenance of the machine.

At Dagartech we cover all the needs that may arise after the purchase of an electric generator, during its installation or throughout the life of the generating set. **We offer you a complete portfolio of after-sales services and the best technical team** to ensure that everything runs smoothly, before, during and after the start-up of your generator set.

At Dagartech, we have a **department exclusively dedicated to advice, sales and assistance in spares and replacement parts.**

Why should you trust us to maintain or repair your generator?

WE ARE PROFESSIONALS

Because we are a **highly qualified, proactive and experienced team of professionals** in the maintenance and repair of electrical generators.

SPECIALISTS IN SPARE PARTS FOR GENERATOR SETS

Because **we give solutions of a high technical level** in the face of complex problems and breakdowns.

AGILE

Due to our **speed** of response.

WE OFFER YOU VARIETY AND QUALITY

Because **we have an extensive catalogue of spare parts** adapted to your needs and we have preferential agreements with leading brands.

WE OFFER YOU FLEXIBILITY

Because we have a **firm commitment to improving the profitability of our clients:**

- Constantly looking for **cost savings** that do not bring value to our customers.
- **Reducing times** of management.
- And **prolonging the life of the generator sets.**

AND BECAUSE WE COVER THE ENTIRE WORLD

Our **scope is international** and our after-sales service as well.

Technical service throughout Spain and internationally

At Dagartech, **we have a network of professionals distributed throughout Spain and internationally**, with which we make sure there's a quick reaction when a generator set does not work properly or has broken down.

See what we can do for you

Tailor-made training courses

We developed and **provide tailor-made training** in areas related to technical assistance, genset tuning and equipment repair.

Spares and replacement parts

Just as important as choosing the generator set that best suits your needs and situations of use knowing how to select the most suitable spare parts so that it works just as it did the first day.

At Dagartech, **we have a department exclusively dedicated to advice, sales and assistance in spares and replacement parts.**

The mission of our Spare Parts Department is to extend the life of your generator set so that it works just as well as the first day.

To achieve this, we at Dagartech have a **wide selection of engines, alternators and various components from leading brands**, guaranteeing the highest quality standards of the market.

Do you want to know more about our technical assistance and spare parts sales services?

Our 5 after-sales keys to make you happy

We want the only thing to concern you to be the enjoyment of your generator set. That's why our After-Sales Department works in an agile and coordinated way, so you can do this as soon as possible.

- 

1 We give you a quick answer.
- 

2 We solve your problems efficiently.
- 

3 We are committed to working on your incident until it is gone.
- 

4 We provide you with a safe and reliable solution.
- 

5 And we have a stock of spare parts that allows us to minimise delivery times.

- If you want a generator set and need **commercial advice** to find the most intelligent energy solution.
- If you're clear on what kind of generator set you need and **you want to request a quote**.
- If you're interested in one of our generator sets and **you want us to inform you about the technical characteristics of a specific reference**.
- If **your set has broken down** and you need us to help you fix it.
- If **you're looking for** commercial advice to find **quality spare parts** for your machine.
